EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In the specification on page 9, line 4, under the heading "Brief Description of the Figures", the application has been amended as follows:

Fig. 4 is a schematic drawing of a twisted structure in accordance with the invention.

Allowable Subject Matter

Claims 1, 3-5, and 7-25 are allowed.

The following is an examiner's statement of reasons for allowance:

The claims are allowed primarily for the inclusion of at least three monofilaments which have been twisted together into a seamed felt for a paper machine. Applicant's arguments are persuasive with respect to the claimed subject matter as they clearly point out the differences between the transverse twisted threads of the present invention and those found in prior art felts. Multistrand yarns or multifilament yarns used in prior art felts comprise filaments which are of substantially smaller diameter than the "monofilaments" claimed in the present invention. The prior art teaches that conventional monofilaments when twisted together do not form a circular cross-section, but form hard knuckles that can mark paper when used in a papermaking felt, therefore the claimed structures of the transverse threads are not suggested by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
